Stunting

NFNSS 2023: about 29% of children under five stunted; 15% severely. Framework working baseline 27%. Complementary feeding in 50% of high-risk areas by 2029.

90-day ask · risk · conclusion

12 · FIVE ASKS

01 Closed technical briefing

NFNSP TWG, DoA secretariat, DBE NSNP, DoH nutrition, DSD food-centre / ECD nutrition, KZN Provincial Treasury, SALGA KZN.

02 Name KwaZulu-Natal

Joint demonstration province — two local municipalities + one metro cluster.

03 PFMA / MFMA workstream

How a fortified ambient meal and a smallholder-linked lot can be bought lawfully — and which rule the 2029 10% target requires.

04 Data protocol

SupplierAdvisor® extracts sit inside MELIA, not beside it. No learner names.

05 A seat at the tables

Private-sector round tables / municipal roadshows the 27 August 2026 Framework is written for.

IN RETURN (90 DAYS)

Costed node pack · three-menu institutional basket vs a reference school meal · producer-onboarding protocol · draft municipal SLA for an IDP/SDBIP annex · one-page risk register.

11 · RISK (SELECTED)

Not an awarded NSNP contract. 2.5 million daily meals is a DBE-pathway plan, not current headcount. 355 000 meals is programme-reported. SupplierAdvisor® does not replace BAS or LOGIS. No learner names in MELIA extracts. PFMA/MFMA path is ask 3 — before scale.

13 · CONCLUSION

The Plan has the targets. The Group has plates, an OS, and a demonstration design. What is asked in 90 days is a closed briefing, a named province, a lawful buying path, a MELIA protocol, and a seat at the tables already written into the Framework.
