

PARTNER PORTAL · CONFIDENTIAL · NFNSP-2

Implementation partnership

Operationalising the National Food and Nutrition Security Plan · 2027–2037

Private briefing for the NFNSP Technical Working Group / Department of Agriculture. Not a government publication. Not an awarded tender. Not a current NSNP daily headcount.

22.2%

Households with inadequate or severely inadequate food access
GHS 2024

~29%

Children under five stunted (severe 15%)

NFNSS 2023

17.6%

Below the food poverty line of R777 pp/pm

Poverty Trends 2025

10 / 20 / 30%

Smallholder share of government food procurement
Framework 2029 / 2033 / 2037

Honesty: 355 000 meals is programme-reported, not millions. 2.5 million children per day is a DBE-pathway plan, not current headcount. SupplierAdvisor® does not replace BAS or LOGIS.

HOW TO READ FIGURES

Official Goal, Enabler and Game-changer titles are from NFNSP-2 Draft 2 (July 2026) and the Results Framework of 27 August 2026. Official statistics (GHS 2024, NFNSS 2023, Poverty Trends 2025) carry a source. Group figures carry a label: plan, programme-reported, product specification, or internal comparison. This document does not invent government contracts, awarded tenders, current daily NSNP volumes, or Framework cells left as XX. SupplierAdvisor® does not replace BAS or LOGIS. No learner names. Treasury, DoH, DSD/SASSA and COGTA/SALGA lead VAT, labelling, grants and the local mandate — Big Five operationalises lots, plates, nodes and MELIA extracts. This briefing does not replace the Plan; it proposes how to operationalise it.

South Africa already has the Plan. What it does not yet have is one partner who can put a lawful plate on a table, a verified smallholder lot behind that plate, and proof that both happened — without inventing a contract, a headcount, or a law.

Framework 2029–2037

The source documents are NFNSP-2 Draft 2 (July 2026, internal) and the Results Framework of 27 August 2026. The operational period is 2027–2037. This proposal uses the official titles in full. Goal 1 transforms the local agri-food system so it is sustainable, diversified and inclusive. Goal 2 is equitable, dignified access to nutritious, safe, affordable food. Goal 3 protects the most vulnerable. Enabler A is multi-actor governance. Enabler B is resourcing — not MELIA. Enabler C is capacity, innovation and data, and that is where MELIA sits.

Those four figures are the Plan’s own case, not ours. Household hunger is not improving fast enough. Stunting is still a first-1 000-days crisis. Poverty is young. And a 10, then 20, then 30 percent smallholder share of government food procurement only survives if the lot, the invoice and the plate are real. Framework cells left as XX are not filled in here.

Big Five Group proposes to run the Game Changers a private partner can actually touch, as one circuit under Big Five Impact — the PMO — rather than as nine vendors. The Gantt on page 5 places every Goal on a year and names the offering. Pages 9 to 13 argue each Goal and Enabler. Page 6 states what each phase must deliver before the next one starts.

Confidential partner briefing — not a government publication and not an awarded tender. 355 000 meals is programme-reported. 2.5 million children per day is a DBE-pathway plan, not current headcount. SupplierAdvisor® does not replace BAS or LOGIS.

The Department of Education has approved Big Five Foods fortified instant porridge, soya mince and OnePot meals for National School Nutrition Programme school feeding. That is menu approval. It is not an awarded NFNSP contract, and it is not a current daily headcount.

Feed is Agri, Foods and Direct. Agri verifies the producer. Foods mills the lot into an ambient plate — porridge ready in under a minute with water or milk, soya mince, OnePot, and soups in 5 kg institutional packs. Direct specifies the last-mile node: agri-hub, produce market, SANTACO rank or rural trader, written as an IDP / DDM annex rather than a national build-out.

Educate is Leadership (super-cube.me). Super-Cube® has six faces — Choices, Principles, Mental, Emotional, Physical and Spiritual — with the person at the centre. It forms the public servants, kitchen teams and implementers who run the protocol. We do not write the national behaviour-change campaign or the Grade 1-12 curriculum.

Empower is Connect (supplieradvisor.com), Access, Foundation and Impact. SupplierAdvisor® is one operating system: verified companies, OTIFEFF scores, purchase orders, invoices and lot holds, and HACCP gates that stop a ship. SchoolAdvisor® is the kitchen gate. It does not replace BAS or LOGIS. Access and Foundation put capital and complementary CSI behind a lawful buy — Enabler B — without reallocating a vote. Impact is the single PMO: one plan, one risk register, one cadence.

Ninety days is the start, not the scale. A closed technical briefing. KwaZulu-Natal named as the joint demonstration — two local municipalities and one metro cluster. A time-boxed PFMA/MFMA workstream for Game Changer 1.2. A MELIA data protocol with no learner names. A seat at the Framework's round tables. Scale only after that circuit holds. In that province, a Heads of Agreement with the Zulu Kingdom is in the process of being signed — community and cultural buy-in, not yet executed, and not an NFNSP award.

The project plan overleaf is the map.

05 · PROJECT PLAN

Select a row to open that Goal or Enabler. Select a pillar name to open Connect, Leadership, Foods or the circuit. Each of those pages links back here. Gold bars are the Impact PMO and the NSNP-approved plate. Forest bars are the other Game Changers and Enablers.

IMPACT STREAM	90 days Q4 26 – Q1 27	2027 KZN year 1	2028 KZN year 2	2029 Plan 10%	2030-33 Plan 20%	2034-37 Plan 30%

Enabler C · OS / MELIA Holds inside MELIA Connect · Leadership · Impact	p.18					

10 / 20 / 30% and 1 / 3 / 5 hubs are Framework targets, not Group headcount. Department of Education approval covers fortified instant porridge, soya mince and OnePot for NSNP menus — not an awarded NFNSP contract. SupplierAdvisor® does not replace BAS or LOGIS.

0 · Mobilise · 90 days

Goal: Enabler A — one Group voice. Objective: close the five asks. Deliverables: TWG briefing, KZN named, PFMA/MFMA workstream, MELIA protocol, Framework tables. Products: Impact PMO, costed node pack, three-menu basket, producer protocol, draft municipal SLA.

1 · Closed KZN circuit · 2027–2028

Goal: Goals 1.1–1.4, 2 and 3 in two locals + one metro. Objective: lot, plate and MELIA extract hold. Deliverables: NSNP-approved porridge, soya mince and OnePot in demo kitchens; SchoolAdvisor® gates; Super-Cube®. Products: 5 kg SKUs, Agri producers, Direct nodes, Connect OS. Scale gate.

2 · Second province · 2029

Goal: repeat a closed circuit. Objective: only if Phase 1 holds. Eastern Cape is the Plan's GHS reference. Framework 10% is a Plan target, not a Group headcount. Products: same NSNP-approved plate, local onboarding, IDP/DDM node spec.

3 · Named circuits · 2030–2033

Goal: Framework 20% as context. Objective: expand only where a lawful buy already holds. 1/3/5 hubs per municipality stays a Plan target. Products: plates, lots, nodes and MELIA extracts; Access and Foundation as complementary rails.

4 · Horizon 2037

Goal: Framework 30% is the Plan's horizon. Objective: hold circuits that already work. Global waits. No invented national volumes. Impact reports programme-reported until audited.

The companies are instruments of one purpose. The Plan needs a partner that already answers to a north star — not a slide deck assembled for a tender.

VISION

A prosperous Africa — for everyone on it

Well-being is not a privilege. Families eat with dignity, leaders decide with integrity, and communities build economies they own. That is the same destination as the NFNSP-2 vision of well-coordinated, inclusive, just local food systems.

MISSION

Feed. Educate. Empower.

We deploy skills, capital, platforms and relationships so Africa can feed its people, educate its leaders, and empower its enterprises — at scale and with proof. That is how Big Five shows up against Goals 1-3 and Enablers A-C.

VALUES

What we refuse to compromise

Humanity, innovation, integrity, excellence, and purposeful impact. Values shape how we hire, partner, trade and deliver — including on this Plan.

FIVE VALUES ON THIS PLAN

Humanity

Goal 3: dignity in kitchens and the first 1 000 days — a plate and a livelihood path, not a grant we set.

Innovation

Enabler C and Goal 1.2: lots, ambient plates, SchoolAdvisor gates. Not BAS or LOGIS.

Integrity

Labelled figures. Programme-reported until audited. No awarded-tender claim.

Excellence

HACCP, published certifications, Super-Cube® for the people who run the protocol.

Impact

PMO under Enabler A. Scale only after a closed KZN circuit holds.

Feed · Educate · Empower is not a slogan beside the Plan. It is the way nine pillars become one delivery against Goals 1-3 and Enablers A-C.

01 FEED

Agri · Foods

Regenerative production and fortified nutrition — farm gate to school kitchen.

Goal 1: hubs, markets, smallholder lots, traders.

Goals 2-3: affordable plates, NSNP, ECD, CNDC, complementary feeding.

Agri opens the lot. Foods mills the plate.

02 EDUCATE

Leadership · Super-Cube®

Six faces, the person at the centre, then the kitchen and the network.

Choices, Principles, Mental, Emotional, Physical, Spiritual. Goal 2.3 and Enabler C. Not the national SBCC or the Grade 1-12 curriculum.

03 EMPOWER

Connect · Direct · Access · Global

SupplierAdvisor®: verified trade, OTIFEFF, lot holds, SchoolAdvisor®.

Goal 1.2 proof that survives PFMA. HACCP can stop the ship. Not BAS or LOGIS. Global waits for a closed circuit.

CROSS-CUTTING · IMPACT · FOUNDATION

Impact is the PMO — Enabler A, one programme, one risk register. Foundation channels 10% of group profits with proof. Complementary CSI — not a substitute for the fiscus or SASSA.

Transformation of the local agri-food system to be sustainable, diversified, and inclusive

Lead: Agriculture. GHS 2024: 22.2% of households still have inadequate food access. Framework: 1 / 3 / 5 new agri-hubs and produce markets per municipality by 2029 / 2033 / 2037.

22.2%

Inadequate household food access

GHS 2024

10%

Smallholder procurement by 2029

Framework

20%

Smallholder procurement by 2033

Framework

30%

Smallholder procurement by 2037

Framework

1.1 Local food value chains — agri-hubs, produce markets, distribution centres

Plan: Municipal spatial planning for agri-hubs, produce markets and distribution centres; revitalise with the private sector; producer-development support.

Big Five: Direct writes a costed micro-hub — storage, water, energy, security — as an IDP / DDM annex, not a hub in every municipality. Agri turns grain into a lot. Connect records identity, GPS and hold. Foods mills it. Access finances only a verified node. Ninety-day return: the costed node pack.

Limit: we do not claim a national agri-hub build-out. Demonstration first.

1.2 Government food procurement from local smallholder producers

Plan: Link public kitchens to local markets. Review procurement so smallholders survive the rules. Target: 10% / 20% / 30% of the food-procurement budget.

Big Five: Connect (SupplierAdvisor®) keeps the company, the OTIFE score, the purchase order, the invoice and the lot hold on one OS, so a smallholder lot can survive a PFMA test. A HACCP hold stops the ship. It does not replace BAS or LOGIS. Foods supplies the 5 kg plates, including the NSNP-approved porridge, soya mince and OnePot.

Limit: Treasury and DoA lead policy. We make a lot those rules can buy.

Urban and peri-urban production, informal traders and spaza shops

Goal 1 continues: production on municipal and customary land, and a hygienic informal market. Framework XX cells are not invented here.

1.3 Urban and peri-urban household and smallholder production

Plan: Extension, farmer support, land access through municipal spatial plans, tenure that can underpin loans. Register targets: +10% / +25% / +50% by 2029 / 2033 / 2037.

Big Five: Agri trains households and smallholders as suppliers. CropAdvisor® records the field and the harvest on the same OS that raises the invoice — not a replacement for provincial extension. Super-Cube® forms the officer: six faces, the person first. Access finances offtake only where tenure can carry a loan.

Limit: we do not allocate land. COGTA, SALGA and traditional authorities lead. We take a verified producer into trade.

1.4 Informal traders and spaza shops — infrastructure and healthy food

Plan: Trading space with storage, water, energy and security; sale of local produce and healthy food; health-and-safety that fits informal operations.

Big Five: Direct specifies the SANTACO-rank and rural node so traders already at transport nodes get storage, water and energy. 15 000 containers is pathway design, not a live fleet. Foods' ambient SKUs — 24-month shelf life — let a spaza hold porridge, soya mince or OnePot without a cold chain. Connect stops the next lot if HACCP does not hold.

Limit: SALGA / COGTA lead by-laws. DoH leads norms. We specify a node and a plate those norms can use.

Equitable and dignified individual, household and community access to nutritious, safe, affordable, and healthy food

Leads: Treasury (affordability), DoH (regulation), GCIS / DBE (behaviour). Poverty Trends 2025: 17.6% below the food poverty line. Framework: 60% of households above that line by 2029.

2.1 Affordable healthy food in the local food environment

Plan: Price stabilisation, VAT methodology, food-waste redirection, possible national food reserve. Targets: 60% / 70% / 80% of households above the food poverty line.

Big Five: Foods puts a costed plate on the table: about R1.10 soup, R1.30 soya mince, R2.50 OnePot — an internal comparison, not a price policy. A 24-month ambient life turns last-mile waste into a hold. The 90-day return is a three-menu basket against a reference school meal.

Limit: Treasury leads VAT, subsidies and a food reserve. We put a costed plate on the table.

2.2 Regulate the food environment toward healthy diets

Plan: Front-of-pack labelling, advertising rules, and school-ground norms. DoH writes the law. DBE leads the school norms.

Big Five: SchoolAdvisor® gates the kitchen and the vendor on SupplierAdvisor®: if the environment is not ready, the next lot does not ship. No learner names. Super-Cube® makes that protocol a skill the adults in the kitchen can run. The NSNP-approved plate sits there as a meal, not as confectionery.

Limit: we do not gazette labelling or advertising rules. We run the gate those rules can use.

2.3 Shift behaviour toward healthy diets

Plan: A national behaviour-change strategy and the school curriculum stay with GCIS and DBE. The Plan also asks for a practical plate people can actually prepare.

Big Five: Super-Cube® assesses six faces, then practises them with the kitchen team — Choices through Spiritual, the person at the centre. Instant porridge — water or milk, under a minute — and a twenty-minute OnePot are the plates they can actually run. Foundation's 10% of group profits is complementary CSI, not the curriculum.

Limit: we do not claim the national airtime or write Grade 1–12. We form the people and the plate a campaign can point to.

Mitigate risks to the most vulnerable through social, livelihood, and nutrition protection

Leads: DSD / SASSA, DoH and DBE. NFNSS 2023: about 29% of children under five stunted (Framework baseline 27%). 355 000 meals is programme-reported, not an NSNP headcount.

3.1 Strengthened social-support systems

Plan: A social-security net aimed at ending food insecurity; livelihood pathways; close holiday and seasonal gaps.

Big Five: Agri and Connect offer a grant household a path to become a supplier — the Plan's livelihood route, labelled as design until it is measured. Foods covers the gaps the grant does not: CNDC and holiday packs of instant porridge. Foundation CSI is complementary, not a SASSA substitute.

Limit: DSD, SASSA and Treasury lead grant levels. We do not set the Child Support Grant.

3.2 High-impact nutrition — NSNP, ECD, CNDC, fortification

Plan: Strengthen school, early-childhood and community feeding, including holiday referrals. DBE and DoH lead the programmes and the stunting target.

Big Five: The Department of Education has approved fortified instant porridge, soya mince and OnePot for NSNP school feeding. Porridge needs only water or milk and is ready in under a minute — no stove, no cold chain, no trained cook — so the same plate can serve NSNP, ECD, CNDC and a holiday pack. SchoolAdvisor proves the lot reached the kitchen. No learner names.

Limit: menu approval is not an awarded NFNSP contract. 2.5 million children per day is a DBE-pathway plan, not current headcount.

3.3 First 1 000 days — complementary feeding 6–23 months

Plan: Preventative feeding for children 6–23 months in 50% then 100% of high-risk areas. Breastfeeding support and any voucher stay with DSD and DoH.

Big Five: The same instant porridge is the complementary plate: water or milk, under a minute, beside breastfeeding support rather than instead of it. Super-Cube® forms the implementers. Foundation does not issue vouchers.

Limit: we do not replace breastfeeding support and we do not set a voucher. We offer the plate and the people in a closed circuit.

In the official Plan, Enabler B is resourcing — not MELIA. Enabler C is capacity, innovation and technological support, and it is Enabler C that carries data and MELIA. This page uses those titles.

A Multi-actor food-system governance

Plan: NFNS Council, IMC on Poverty, Premier and Mayoral committees, a Food and Nutrition Security Bill, IDP / DDM One Plans, quarterly round tables.

Big Five: Impact is the PMO: one programme plan, one risk register, one cadence, so the TWG hears one Group voice. Ninety days returns the closed briefing, a seat at the Framework tables, and a draft municipal SLA for an IDP annex.

Limit: we do not appoint the Council or draft the Act. COGTA and SALGA lead the local mandate.

B–C Resourcing, capacity, innovation and MELIA

Plan: Enabler B is resourcing (costing, DFIs, 50% then 100% of unfunded activities). Enabler C is capacity and data — MELIA sits here, not under B.

Big Five: Access and Foundation finance offtake and complementary CSI — Enabler B — without reallocating a vote. Enabler C is Super-Cube® for the people and SupplierAdvisor® for the record: OTIFEFF, lot holds, SchoolAdvisor® gates, extracts inside MELIA. No learner names.

Limit: we do not reallocate votes. SupplierAdvisor® does not replace BAS or LOGIS.

The Department does not need nine vendors. It needs one circuit mapped to the Plan's Game Changers: Agri opens a lot (1.3), Connect proves it for the 10% target (1.2), Foods mills a plate (Goals 2–3), Direct moves it to hub, market, rank and kitchen (1.1, 1.4). Leadership forms people. Impact reports programme-reported until audited.

01 Agri Smallholders onboard with practice, soil and identity. Grain is a lot, not a donation.	02 Connect SupplierAdvisor® records the lot, the invoice, the hold. BAS/LOGIS stay.	03 Foods The mill turns the lot into a fortified ambient plate.	04 Direct The plate moves to school, ECD, CNDC, rank and rural node.	05 People Leadership runs the kitchen. Impact reports programme-reported until audited.
--	---	---	--	---

NINE PILLARS — WHAT EACH DOES FOR NDA

FEED Agri Goal 3 — the 10% smallholder target has no meaning without producers who can invoice.	FEED Foods Goals 1 and 2 — the plate. Certifications as published on bigfivegroup.africa/foods .	EDUCATE Leadership Goal 2 agency + Enabler A — programmes fail when people are unformed.
EMPOWER Connect Goal 3 proof + Enablers B and C — the OS the Plan can actually use. Not BAS/LOGIS.	EMPOWER Direct Goal 1 access — 15 000 containers is pathway design, to be measured.	EMPOWER Access Enabler C — capital behind a lawful buy.
CROSS-CUT Impact Enabler A — one PMO, not nine slide decks.	CROSS-CUT Foundation Goal 2 complementary feeding CSI — 10% of group profits, standing policy.	EMPOWER Global After a closed KZN circuit — not a current scale claim.

WHERE EACH PILLAR SITS ON THE PLAN

PILLAR	G1 Agri-food	G2 Access	G3 Protect	EA Gov.	EB Resource	EC Cap/data
Agri	●	—	●	—	—	●
Foods	●	●	●	—	—	●
Leadership	●	●	●	●	—	●
Connect	●	●	●	—	●	●
Direct	●	●	●	●	—	—
Access	●	—	—	—	●	—
Impact	●	—	●	●	●	●
Foundation	—	●	●	—	●	—
Global	—	—	—	—	—	—

Gold mark = primary contribution. Global is held until a closed KZN circuit — not a current scale claim.

Access is not improving fast enough

GHS 2024: 22.2% of households have inadequate or severely inadequate food access. Northern Cape 34.3%, Eastern Cape 31.2%, North West 30%.

GHS 2024, as cited in NFNSP-2

Stunting remains a first-1 000-days crisis

NFNSS 2023: about 29% of children under five stunted; 15% severely. Framework working baseline: 27%. Complementary feeding target: 50% of high-risk areas by 2029.

NFNSS 2023 · Framework 27 Aug 2026

Poverty is young

Poverty Trends 2025: 17.6% of people below the food poverty line of R777 per person per month (2023 prices). 71% of the poor in 2023 were under 35.

Poverty Trends 2025, as cited in the Plan

Procurement must reach smallholders

Plan targets: 10% (2029) / 20% (2033) / 30% (2037) smallholder share of government food procurement. That target only survives PFMA if lots, invoices and identity are real.

NFNSP-2 procurement horizons

READING THE PLAN

NFNSP-2 Draft 2 (July 2026, internal discussion) and the Results Framework of 27 August 2026 are the source documents. Official Goal, Enabler and Game-changer titles are used in full. The 90-day ask is a seat at the Framework's private-sector round tables — not a claim that they have already been held with Big Five. Several Framework cells remain XX and are not invented here.

WHO WE ARE

Big Five Group (Pty) Ltd — KwaZulu-Natal. Feed (Foods, Agri, Direct), Educate (Super-Cube®), Empower (SupplierAdvisor®, Foundation, Impact). Dr. Craig R. Muller, Founder — craig@bigfivegroup.africa · +27 (0) 82 581 4215. This is a private partner workspace for the NFNSP Technical Working Group / Department of Agriculture. It does not speak for the Department.

One SKU family across NSNP, ECD, CNDC and holiday packs. Instant fortified porridge is the malnutrition plate: add water or milk; ready in under a minute.

Department of Education approval for NSNP school feeding: fortified instant porridge, soya mince and OnePot meals. Menu approval — not an awarded NFNSP contract, and not a current daily headcount.

FIVE WORKSTREAMS A–E

A Plates

DoE-approved for NSNP: fortified instant porridge (water or milk, under a minute), soya mince and OnePot, plus soups. 5 kg packs.

B Markets

Costed container / micro-hub spec for an IDP / DDM One Plan. SANTACO rank + rural nodes.

C Producers

SupplierAdvisor®: OTIFEFF, the lot and the invoice on one OS. Not BAS or LOGIS.

D Agency

Super-Cube® six faces for the adults who run the plate. Porridge and OnePot. Not the curriculum.

E OS

SchoolAdvisor® gates the kitchen. HACCP holds stop the ship. MELIA extract. No learner names.

DEMONSTRATION DESIGN

Phase 1: two KZN municipalities and one metro cluster. Phase 2: a second high-inadequacy province, only after that circuit holds. Eastern Cape is the Plan's reference.

Six faces. The person at the centre.

Super-Cube® is the Educate pillar (super-cube.me). Six developable faces, the person at the centre, then the team and the supply network. Dr Craig Ross Muller developed it as his DBA at the University of KwaZulu-Natal in 2020, and tested it in an African FMCG network.

We form the adults who run kitchens, hubs, extension and municipal SLAs. We do not write the national behaviour-change campaign or the Grade 1-12 curriculum. Learner names do not enter the MELIA extract.

Choices

A buyer or kitchen lead chooses a lawful lot — not an invented headcount.

Principles

The record stays honest: labelled figures, no tender claim, no learner names.

Mental

An IDP annex, a MELIA extract and a kitchen gate people can run.

Emotional

Producer, mill and school kitchen trust one circuit, not one meeting.

Physical

The stamina to run a feeding day. The plate itself stays with Foods.

Spiritual

Dignity in a school kitchen and in the first 1 000 days.

01 The person

Implementer, kitchen lead or extension officer. Assess the six faces, then practise.

02 Kitchen or hub

One operation shares the same language for judgement and care.

03 Supply network

Producer, mill, transporter and kitchen. Industry scale waits for a closed circuit.

An FMCG value-chain case recorded lifts on all six faces. Principles was the largest, at +45.1%. That is one network — not an NFNSP result, and not a forecast for KwaZulu-Natal.

super-cube.me

One chain: verify, trade, hold, ship, prove

SupplierAdvisor® (supplieradvisor.com) does not replace BAS or LOGIS. It is the trade and quality layer those systems do not have. No learner names.

Core OS

Verified companies. Buy and sell, inventory, make, ship, finance, SHEQ and quality. OTIFEF scores every delivery On-Time, In-Full, Error-Free. Purchase orders, invoices and lot holds sit on the same books.

Food safety

HACCP plans and inspections that block shipping when a lot is on hold. When a lot fails, the ship stops.

SchoolAdvisor®

The NSNP kitchen gate on the same OS. A kitchen or vendor that is not ready does not receive the next lot. Lot-and-kitchen proof for MELIA.

CropAdvisor®

Fields, harvest and the farm-to-buyer handoff, so a household lot can become an invoice. Not a replacement for provincial extension.

supplieradvisor.com

ACTOR	WHAT THE OS HOLDS
Smallholder	Identity, lot, invoice and OTIFEF so the 10% target can survive PFMA.
Foods mill	BOM, MPS, MRP. HACCP hold stops the ship.
School / ECD / CNDC	SchoolAdvisor® gate. Lot-and-kitchen proof. No learner names.
Municipality	The extract sits inside MELIA. BAS and LOGIS stay the systems of record.

Connect, on the previous page, is the operating system. The same Empower mission carries the plate the rest of the way: a container, a lawful buy, a corridor after proof, a PMO, and a foundation that gives back.

Direct — Containers and last mile

A SANTACO rank, produce market or rural node — storage, water and energy — so an ambient plate can be held. Specified for an IDP or DDM One Plan. Goals 1.1 and 1.4. 15 000 containers is pathway design, not a live fleet. SALGA and COGTA lead the space.

Access — Government funding and feeding schemes

How a school, hospital, ECD, CNDC or municipality can buy the plate and a smallholder lot lawfully, with offtake finance where tenure can carry it. Enabler B. Access does not award the scheme, set the grant, or reallocate a vote.

Global — Exports, after proof

Standards and a corridor for when a closed KwaZulu-Natal circuit is ready to travel. The Group's wider route-to-market work is not this partnership's export book. No invented cross-border volume.

Impact — PMO — delivers the project

One plan, one risk register, one cadence across Feed, Educate and Empower. Gates the 90 days and the demonstration. Programme-reported until audited. Enabler A. Does not appoint the Council or draft the Act.

Foundation — Giving back

Registered non-profit. Ten percent of group profits, standing policy, with proof on SupplierAdvisor®. Social, economic and environmental development. Complementary CSI for Goals 2 and 3 — not the fiscus, not SASSA, not a voucher.

A Kingdom partnership, in signature

Big Five Group is in the process of signing a Heads of Agreement with the Zulu Kingdom — the Private Office of His Majesty King Misuzulu kaZwelithini. Signature is not complete. This is not an NFNSP award.

The proposed programme in that Heads of Agreement is Isidlo seSilo — a Kingdom nutrition pathway rooted in Ubuntu, dignity and heritage. KwaZulu-Natal is the demonstration province in this briefing. A circuit communities recognise as food of the Nation is received differently from a vendor drop. Royal legitimacy and household reach are the cultural rail. They do not replace a municipal mandate, a PFMA test, or the Department's own decision.

Community buy-in

Traditional leadership and household pathways, so producers, kitchens and traders meet the plate as something of their own place.

A cultural home

Isidlo seSilo is proposed, not proclaimed. Until the Heads of Agreement is signed, treat the programme as in signature.

What this is not

Not an awarded NFNSP contract. Not a gazetted royal appointment. Not consent from every municipality. Not a reason to skip the 90-day legal workstream.

Private workspace · bigfivegroup.africa/partner/zulu-kingdom

That workspace is private to the Zulu Kingdom partnership. This page does not reproduce the Heads of Agreement.

What is asked in 90 days is a closed briefing, a named province, a lawful buying path, a MELIA protocol, and a seat at the tables already written into the Framework. Scale only after a closed circuit holds.

01 Closed technical briefing

NFNSP TWG, DoA secretariat, DBE NSNP, DoH nutrition, DSD food-centre / ECD nutrition, KZN Provincial Treasury, SALGA KZN.

02 Name KwaZulu-Natal

Joint demonstration province — two local municipalities + one metro cluster.

03 PFMA / MFMA workstream

Time-boxed: how a fortified ambient meal and a smallholder-linked lot can be bought lawfully — and which rule the 2029 10% target actually requires.

04 Data protocol

SupplierAdvisor® extracts sit inside MELIA, not beside it. No learner names.

05 A seat at the tables

Private-sector round tables / municipal roadshows the 27 August 2026 Framework is written for.

IN RETURN (90 DAYS)

Costed node pack

Three-menu institutional basket vs a reference school meal

Producer-onboarding protocol

Draft municipal SLA for an IDP/SDBIP annex

One-page risk register

RISK	MITIGATION
NSNP approval read as an NFNSP contract	DoE approved porridge, soya mince and OnePot for NSNP menus. This briefing is not an awarded NFNSP contract.
2.5 million daily meals read as current	Labelled as DBE-pathway plan, not current headcount.
BAS / LOGIS replacement fear	Explicit non-claim: SupplierAdvisor® does not replace BAS or LOGIS.
Learner data in MELIA extract	Lot-and-kitchen proof only. No learner names. POPIA purpose-limited.
PFMA / MFMA cannot buy the meal	90-day time-boxed legal workstream is ask 3 — before scale.

COMMERCIAL MODEL — LABELLED GROUP FIGURES, NOT GOVERNMENT CONTRACTS

355 000 meals

Programme-reported, not audited public stats

2.5 million children / day

DBE-pathway delivery plan, not current headcount

15 000 SANTACO containers

Pathway design

~20 jobs per mature node

Design intent, to be measured

10% of group profits to Foundation

Standing Group policy

CONCLUSION

The Plan has named Goals, Game Changers and Enablers. The Group has plates, an operating system, and a demonstration design mapped to each of them. What is asked in 90 days is a closed briefing, a named province, a lawful buying path for Game Changer 1.2, a MELIA protocol, and a seat at the tables already written into the Framework. Nothing here is an awarded tender, a current daily NSNP headcount, a replacement for BAS or LOGIS, or a claim to gazette VAT, grants or a Food and Nutrition Security Act.
