

Implementation partnership

Operationalising the National Food and Nutrition Security Plan · 2027–2037

Private briefing for the NFNSP Technical Working Group / Department of Agriculture. Not a government publication. Not an awarded tender. Not a current NSNP daily headcount.

22.2%

Households with inadequate or severely inadequate food access

GHS 2024, as cited in NFNSP-2

~29%

Children under five stunted (severe 15%; Framework baseline 27%)

NFNS 2023

17.6%

People below the food poverty line of R777 pp/pm (2023 prices)

Poverty Trends 2025

10 / 20 / 30%

Smallholder share of government food procurement

Plan targets 2029 / 2033 / 2037

Honesty: programme-reported meals to date are in the hundreds of thousands (355 000 on the Group site), not millions. The 2.5 million children-per-day NSNP figure is a DBE-pathway plan, not a current daily headcount. SupplierAdvisor® does not replace BAS or LOGIS.

HOW TO READ FIGURES

Official Goal, Enabler and Game-changer titles are from NFNSP-2 Draft 2 (July 2026) and the Results Framework of 27 August 2026. Official statistics (GHS 2024, NFNSS 2023, Poverty Trends 2025) carry a source. Group figures carry a label: plan, programme-reported, product specification, or internal comparison. This document does not invent government contracts, awarded tenders, current daily NSNP volumes, or Framework cells left as XX. SupplierAdvisor® does not replace BAS or LOGIS. No learner names. Treasury, DoH, DSD/SASSA and COGTA/SALGA lead VAT, labelling, grants and the local mandate — Big Five operationalises lots, plates, nodes and MELIA extracts. This briefing does not replace the Plan; it proposes how to operationalise it.

03 · EXECUTIVE SUMMARY

South Africa has a Plan with named Goals, Game Changers and Enablers. What it needs now is an implementation partner that can put a lawful plate on the table, a verified smallholder lot behind that plate, and proof that both happened — without claiming a government contract, and without pretending to gazette VAT, grants or a Food and Nutrition Security Act.

Official Goal titles, used in full: Goal 1 — Transformation of the local agri-food system to be sustainable, diversified, and inclusive. Goal 2 — Equitable and dignified individual, household and community access to nutritious, safe, affordable, and healthy food. Goal 3 — Mitigate risks to the most vulnerable through social, livelihood, and nutrition protection. Enabler A — multi-actor governance. Enabler B — resourcing. Enabler C — capacity, innovation and technological support, including data and MELIA. Sources: NFNSP-2 Draft 2 (July 2026) and Results Framework 27 August 2026. Period: 2027–2037.

GHS 2024: 22.2% of households have inadequate or severely inadequate food access (Northern Cape 34.3%, Eastern Cape 31.2%, North West 30%). NFNSS 2023: about 29% of children under five stunted; 15% severely (Framework working baseline 27%). Poverty Trends 2025: 17.6% below the food poverty line of R777 pp/pm (2023 prices). Framework targets include 10% / 20% / 30% of the government food-procurement budget from smallholders by 2029 / 2033 / 2037; complementary feeding in 50% then 100% of high-risk areas; and 1 / 3 / 5 new agri-hubs and produce markets per local or metro municipality.

Big Five Group operationalises the Game Changers a private partner can actually run — as one circuit. Agri verifies producers. Foods mills lots into fortified ambient plates for NSNP, ECD, CNDC and holiday packs. Direct specifies IDP/DDM nodes and trader infrastructure. Connect (SupplierAdvisor®) is the farm-to-fork OS. Leadership (Super-Cube®) forms people. Access opens capital. Impact is the PMO. Foundation channels 10% of group profits. Mandate honesty: Treasury leads VAT and a possible food reserve; DoH leads FoP and advertising rules; DSD/SASSA lead grants and vouchers; COGTA/SALGA lead the local mandate.

We ask for 90 days: a closed technical briefing; KwaZulu-Natal as joint demonstration (two local municipalities + one metro cluster); a PFMA/MFMA workstream against Game Changer 1.2; a MELIA data protocol; and a seat at the private-sector round tables the Framework is written for. Scale only after a closed circuit holds.

THIS WORKSPACE

Confidential partner briefing. It is not a government publication, not an awarded tender, and not a claim of current NSNP daily headcount. Programme-reported meals to date: 355 000 (Group site). 2.5 million children per day is a DBE-pathway plan.

04 · GOAL 1 · GAME CHANGERS 1.1–1.2

Transformation of the local agri-food system to be sustainable, diversified, and inclusive

Lead: Agriculture. Support: SALGA, municipalities, DSBD, COGTA, Treasury, DBE, DSD, DoH. Source: NFNSP-2 Draft 2 (July 2026) and Results Framework 27 August 2026. GHS 2024: 22.2% of households still have inadequate or severely inadequate food access.

1.1 Local food value chains — agri-hubs, produce markets, distribution centres

Plan: Municipal spatial planning for agri-hubs, produce markets and food-distribution centres; revitalise with the private sector; implement Comprehensive Producer Development Support; business-support mechanisms. Targets: map existing; 1 / 3 / up to 5 new hubs and markets per local or metro municipality by 2029 / 2033 / 2037; 3 / 10 / 15 business-support mechanisms.

Big Five: Direct: costed container/micro-hub spec as an IDP / SDF / DDM One Plan annex. Agri: regenerative onboarding so grain is a lot. Connect: identity, GPS, grade, lot and hold. Foods mill: BOM, MPS, MRP, HACCP — the processor the Plan's value-chain framework asks for. Access: capital for verified nodes. 90-day return: costed node pack.

Limit: we do not replace municipal spatial planning and we do not claim a national agri-hub build-out. Demonstration first.

1.2 Government food procurement from local smallholder producers and processors

Plan: Link institutions that procure food to local markets; review procurement so smallholder realities survive the rules; align supply with demand; write a value-chain framework from producer to aggregation. Targets: 10% / 20% / 30% of the government food-procurement budget from smallholders by 2029 / 2033 / 2037.

Big Five: Connect: identity, GPS, lots, invoices so the 10% target survives PFMA. Foods: 5 kg institutional SKUs. 90-day ask 3: PFMA/MFMA workstream. 90-day return: value-chain one-pager producer → hub → mill → kitchen, including hold-or-ship.

Limit: Treasury and DoA lead policy revision. We do not rewrite national procurement regulations. We make a lot those regulations can buy.

05 · GOAL 1 · GAME CHANGERS 1.3–1.4

Urban and peri-urban production, informal traders and spaza shops

The same Goal 1 continues: production on municipal, customary and state land, and a hygienic informal market. Framework cells left as XX (SMME counts, municipal capacity) are not invented here.

1.3 Urban and peri-urban household and smallholder production

Plan: Capacity-building; more and better extension; farmer support; land access through municipal spatial plans; tenure that can underpin loans; youth, women and persons with disabilities among new producers. Targets: 10% / 25% / 50% increase on the DoA producer register by 2029 / 2033 / 2037.

Big Five: Agri: regenerative practice, soil and offtake — farmers trained as suppliers. Leadership (Super-Cube®): capability for implementers and municipal officers. Access: finance offtake where tenure is defensible. Connect: a verified network, not a mailing list.

Limit: we do not allocate municipal, communal or state land. COGTA, SALGA and traditional authorities lead land. We take a verified producer into trade.

1.4 Informal traders and spaza shops — accreditation, infrastructure, healthy food

Plan: Municipal plans for trading space and infrastructure (transport, storage, water, sanitation, energy, security); sale of local produce and healthy food; collective bargaining; finance; health-and-safety compliance that fits informal operations.

Big Five: Direct: SANTACO-rank and rural node spec. 15 000 containers is pathway design, not a live national fleet. Foods: ambient SKUs a spaza can hold without a cold chain (24-month shelf life, product specification). Connect: HACCP holds. Leadership: 5-minute porridge / 20-minute OnePot protocol.

Limit: SALGA / COGTA lead by-laws and trading space. DoH leads health-and-safety norms. We specify a node and a plate those norms can use.

06 · GOAL 2 · GAME CHANGERS 2.1–2.3

Equitable and dignified individual, household and community access to nutritious, safe, affordable, and healthy food

Leads vary: Treasury (affordability), DoH (regulation), GCIS / DBE (behaviour). Poverty Trends 2025: 17.6% below the food poverty line of R777 pp/pm (2023 prices).

2.1 Enhance the local food environment — affordable healthy food

Plan: Price-stabilisation path (VAT methodology, subsidies, health-promotion levy, food-waste redirection, possible national food reserve, shock plan).
Targets: 60% / 70% / 80% of households above the food poverty line; 60% / 75% / 100% VAT-exempt share of the STATS SA basket.

Big Five: Foods: institutional cost points, approximate — ~R1.10 soup / ~R1.30 soya / ~R2.50 OnePot (internal comparison ~50% below wholesale/retail).
Ambient 24-month shelf life so last-mile waste is a hold. Holiday and CNDC packs. 90-day return: three-menu basket versus a reference school meal.

Limit: Treasury leads VAT, subsidies, a food reserve and a national shock plan. We put a costed plate on the table those instruments can buy.

2.2 Regulate the local food environment toward healthy diets

Plan: Front-of-pack labelling; advertising of unhealthy food; healthy tuckshops, spazas and cafeterias; school-ground and around-school norms; supermarket placement.

Big Five: Connect / SchoolAdvisor: kitchen and vendor gates — a school environment that is not ready does not receive the next lot. No learner names.
Leadership: school-environment protocol. Foods: one SKU family that can sit in a tuckshop or NSNP kitchen.

Limit: DoH gazettes FoP and advertising rules. DBE leads school-ground norms. We run the kitchen and vendor gate those regulations can use.

2.3 Holistic food and nutrition behavioural-change strategy

Plan: Costed SBCC; obesity-prevention strategy; nutrition and agriculture in the Grade 1–12 curriculum; updated SA food-based dietary guidelines; indigenous recipes; practical toolkits.

Big Five: Leadership (Super-Cube®): agency for kitchen teams and municipal officers. Foods: 5-minute porridge / 20-minute OnePot under the energy constraints the Plan names. Indigenous recipes as SKU work. Foundation: 10% of group profits as complementary CSI — not a substitute for GCIS or DBE curriculum.

Limit: GCIS / Communications and DBE lead national SBCC and curriculum. We form the people and the plate a campaign can point to.

07 · GOAL 3 · GAME CHANGERS 3.1–3.3

Mitigate risks to the most vulnerable through social, livelihood, and nutrition protection

Leads: DSD / SASSA (social support); DoH and DBE (nutrition-specific); DSD with DoH (first 1 000 days). NFNSS 2023: about 29% of children under five stunted; Framework working baseline 27%.

3.1 Strengthened social-support systems

Plan: Review the social-security net with ending food insecurity as the primary target; livelihood pathways; explore lifting grants toward the nutrition poverty line; close calendar gaps (holidays, last week of the month, seasonal farm work).

Big Five: Agri + Connect: offtake so a grant household can become a supplier. Foods: CNDC and holiday packs for the calendar gaps the Plan names. Foundation: 10% of group profits as complementary CSI — not a substitute for SASSA.

Limit: DSD, SASSA and Treasury lead grant levels. We do not set the Child Support Grant.

3.2 High-impact nutrition — NSNP, ECD, CNDC, fortification, referrals

Plan: Strengthen NSNP, ECD, CNDC and related pilots; referral systems including holidays; equalise ECD nutrition; review fortification vehicles. Targets: 3% / 5% / 10% stunting reduction; 40% / 60% / 80% of ECD centres receiving nutrition support.

Big Five: Foods: one SKU family across NSNP, ECD, CNDC and holiday packs. 74% more nutrition / 185% more fortification are formulation/design claims — lab pack in the first 90 days. SchoolAdvisor: lot-and-kitchen proof. No learner names. Impact: 355 000 meals is programme-reported, not an NSNP headcount.

Limit: DBE and DoH lead NSNP, ECD nutrition and stunting %. 2.5 million children per day is a DBE-pathway plan, not current headcount.

3.3 First 1 000 days — maternal/child support and complementary feeding 6–23 months

Plan: Holistic maternal/child support; breastfeeding support; preventative supplemental feeding for children 6–23 months in high-risk areas (50% by 2029, 100% by 2033). Draft 2 also records a WHO-Code-aligned voucher pathway — DSD lead.

Big Five: Foods: complementary-feeding SKU work for the 6–23 month window, labelled formulation/design until the 90-day lab pack. Leadership: Super-Cube® for implementers. Foundation: complementary CSI rail — not a voucher scheme.

Limit: DSD and DoH lead maternal policy and any voucher instrument. We do not issue nutrition vouchers and we do not replace breastfeeding support.

08 · GOVERNANCE, RESOURCING, CAPACITY AND DATA

In the official Plan, Enabler B is resourcing — not MELIA. Enabler C is capacity, innovation and technological support, and it is Enabler C that carries data and MELIA. This page uses those titles.

A Integrated, participatory, mainstreamed multi-actor food-system governance

Plan: NFNS Council; IMC on Poverty; Premier and Mayoral committees; FNS Bill then Act; local-government mandate; 30% / 50% / 100% of local municipalities revise IDPs; 100% of DDM One Plans include a food-systems component by 2029; round tables quarterly.

Big Five: Impact as PMO — one programme, one risk register, one cadence. 90-day asks 1 and 5: closed TWG briefing and a seat at Framework round tables. 90-day return: draft municipal SLA for an IDP/SDBIP annex. Direct: node spec in DDM One Plan language. Leadership: Super-Cube® so coordination is a skill.

Limit: we do not appoint the NFNS Council, draft the Act, or write departmental APPs. COGTA and SALGA lead the local mandate.

B Adequate and effective resourcing of a well-coordinated local agri-food system

Plan: Full costing; SEIAS; MTEF/APP alignment; possible conditional grant; DFI, climate and private capital; SETA lines. Targets: 50% of unfunded NFNSP activities funded by 2029 and 100% by 2033.

Big Five: Access: institutional, CSI and DFI pathways that finance offtake, not workshops. Connect: GL / AR / AP / VAT and selected bank feeds so money and lots reconcile. Foundation: 10% of group profits (standing policy) as a complementary rail. 90-day return: costed node pack and one-page risk register.

Limit: we do not reallocate votes or design a conditional grant. Treasury leads. We cost a closed-circuit demonstration those votes can buy.

C Increased capacity, innovation and technological support — including MELIA

Plan: Capacity-needs assessment; vocational packs; municipal leadership; ARC genetic material at cost-recovery; multi-sectoral information system; MELIA; 80% then 100% of indicator data submitted and cleaned.

Big Five: Leadership (Super-Cube®) and Agri onboarding for the people who will run a KZN circuit. SupplierAdvisor® extracts sit inside MELIA, not beside it. Lot-and-kitchen proof only. No learner names. POPIA purpose-limited. SchoolAdvisor gates.

Limit: SupplierAdvisor® does not replace BAS or LOGIS, and it is not a parallel national dashboard. It is the trade and quality layer those systems do not have.

09 · FEED · EDUCATE · EMPOWER

The Department does not need nine vendors. It needs one circuit mapped to the Plan's Game Changers: Agri opens a lot (1.3), Connect proves it for the 10% target (1.2), Foods mills a plate (Goals 2–3), Direct moves it to hub, market, rank and kitchen (1.1, 1.4). Leadership forms people. Impact reports programme-reported until audited.

01 Agri Smallholders onboard with practice, soil and identity. Grain is a lot, not a donation.	02 Connect SupplierAdvisor® records the lot, the invoice, the hold. BAS/LOGIS stay.	03 Foods The mill turns the lot into a fortified ambient plate.	04 Direct The plate moves to school, ECD, CNDC, rank and rural node.	05 People Leadership runs the kitchen. Impact reports programme-reported until audited.
--	---	---	--	---

NINE PILLARS — WHAT EACH DOES FOR NDA

FEED Agri Goal 3 — the 10% smallholder target has no meaning without producers who can invoice.	FEED Foods Goals 1 and 2 — the plate. Certifications as published on bigfivegroup.africa/foods .	EDUCATE Leadership Goal 2 agency + Enabler A — programmes fail when people are unformed.
EMPOWER Connect Goal 3 proof + Enablers B and C — the OS the Plan can actually use. Not BAS/LOGIS.	EMPOWER Direct Goal 1 access — 15 000 containers is pathway design, to be measured.	EMPOWER Access Enabler C — capital behind a lawful buy.
CROSS-CUT Impact Enabler A — one PMO, not nine slide decks.	CROSS-CUT Foundation Goal 2 complementary feeding CSI — 10% of group profits, standing policy.	EMPOWER Global After a closed KZN circuit — not a current scale claim.

WHERE EACH PILLAR SITS ON THE PLAN

PILLAR	G1 Agri-food	G2 Access	G3 Protect	EA Gov.	EB Resource	EC Cap/data
Agri	●	—	●	—	—	●
Foods	●	●	●	—	—	●
Leadership	●	●	●	●	—	●
Connect	●	●	●	—	●	●
Direct	●	●	●	●	—	—
Access	●	—	—	—	●	—
Impact	●	—	●	●	●	●
Foundation	—	●	●	—	●	—
Global	—	—	—	—	—	—

Gold mark = primary contribution. Global is held until a closed KZN circuit — not a current scale claim.

10 · WHY NOW — THE PLAN'S OWN NUMBERS

Access is not improving fast enough

GHS 2024: 22.2% of households have inadequate or severely inadequate food access. Northern Cape 34.3%, Eastern Cape 31.2%, North West 30%.

GHS 2024, as cited in NFNSP-2

Stunting remains a first-1 000-days crisis

NFNSS 2023: about 29% of children under five stunted; 15% severely. Framework working baseline: 27%. Complementary feeding target: 50% of high-risk areas by 2029.

NFNSS 2023 · Framework 27 Aug 2026

Poverty is young

Poverty Trends 2025: 17.6% of people below the food poverty line of R777 per person per month (2023 prices). 71% of the poor in 2023 were under 35.

Poverty Trends 2025, as cited in the Plan

Procurement must reach smallholders

Plan targets: 10% (2029) / 20% (2033) / 30% (2037) smallholder share of government food procurement. That target only survives PFMA if lots, invoices and identity are real.

NFNSP-2 procurement horizons

READING THE PLAN

NFNSP-2 Draft 2 (July 2026, internal discussion) and the Results Framework of 27 August 2026 are the source documents. Official Goal, Enabler and Game-changer titles are used in full. The 90-day ask is a seat at the Framework's private-sector round tables — not a claim that they have already been held with Big Five. Several Framework cells remain XX and are not invented here.

WHO WE ARE

Big Five Group (Pty) Ltd — KwaZulu-Natal. Feed (Foods, Agri, Direct), Educate (Super-Cube®), Empower (SupplierAdvisor®, Foundation, Impact). Dr. Craig R. Muller, Founder — craig@bigfivegroup.africa · +27 (0) 82 581 4215. This is a private partner workspace for the NFNSP Technical Working Group / Department of Agriculture. It does not speak for the Department.

11 · BIG FIVE FOODS — LABELLED GROUP FIGURES

One SKU family across NSNP, ECD, CNDC and holiday packs. Ambient, fortified, institutional 5 kg formats where school- or clinic-linked.

~R1.10 soup / ~R1.30 soya / ~R2.50 OnePot per meal

Institutional cost points, approximate

~50% below wholesale/retail

Internal cost comparison

24-month ambient shelf life

Product specification

74% more nutrition / 185% more fortification

Formulation / design claims; lab pack in first 90 days

ISO 9001, FSSC 22000, Sedex, SANHA Halaal, Kosher, SAAFoST
As published on bigfivegroup.africa/foods

FIVE WORKSTREAMS A–E

A Plates

One SKU family across NSNP, ECD, CNDC and holiday packs. 5 kg institutional packs.

B Markets

Costed container / micro-hub spec for an IDP / DDM One Plan. SANTACO rank + rural nodes.

C Producers

SupplierAdvisor® identity, GPS, lots, invoices so the 10% target survives PFMA.

D Agency

5-minute porridge / 20-minute OnePot; 6–23 month complementary feeding. Super-Cube® for implementers.

E OS

Onboarding, FNB/BankLink feeds, SchoolAdvisor gates, POPIA MELIA extract. No learner names.

DEMONSTRATION DESIGN

Phase 1: two KZN local municipalities + one metro cluster (rural Zululand-type, peri-urban, dense informal-trade node in eThekweni or Msunduzi).
Phase 2: a second high-inadequacy province (Eastern Cape is the Plan's own reference). Scale only after a closed circuit holds.

12 · OPERATING SYSTEM

One workspace: network, buy, make, hold, ship, pay, prove

SupplierAdvisor® does not replace BAS or LOGIS. It is the trade and quality layer those systems do not have.

Verified network + OTIFEF	POs, invoices, lot holds	Inventory
BOM / MPS / MRP	GPS shipping	HACCP holds that stop ship
SHEQ	SchoolAdvisor	ContainerAdvisor®
Full GL / AR / AP / VAT	FNB Integration Channel + BankLink	Yoco-class last-mile acceptance

ACTOR TABLE — FARM TO FORK

ACTOR	ROLE IN THE CIRCUIT
Smallholder	Identity, GPS, lots, invoices so the 10% target survives PFMA.
Aggregation hub	Receive, grade, lot, hold.
Foods mill	BOM, MPS, MRP, HACCP, ship-or-hold.
Trader / distributor	OTIFEF, inventory, invoices.
School / ECD / CNDC	SchoolAdvisor gates. Lot-and-kitchen proof. No learner names.
Municipality / Treasury	SLA, IDP/SDBIP annex, PFMA/MFMA workstream.
Bank / CSI / DFI	FNB Integration Channel and BankLink feeds where selected.

13 · FIVE ASKS

What is asked in 90 days is a closed briefing, a named province, a lawful buying path, a MELIA protocol, and a seat at the tables already written into the Framework. Scale only after a closed circuit holds.

01 Closed technical briefing

NFNSP TWG, DoA secretariat, DBE NSNP, DoH nutrition, DSD food-centre / ECD nutrition, KZN Provincial Treasury, SALGA KZN.

02 Name KwaZulu-Natal

Joint demonstration province — two local municipalities + one metro cluster.

03 PFMA / MFMA workstream

Time-boxed: how a fortified ambient meal and a smallholder-linked lot can be bought lawfully — and which rule the 2029 10% target actually requires.

04 Data protocol

SupplierAdvisor® extracts sit inside MELIA, not beside it. No learner names.

05 A seat at the tables

Private-sector round tables / municipal roadshows the 27 August 2026 Framework is written for.

IN RETURN (90 DAYS)

Costed node pack

Three-menu institutional basket vs a reference school meal

Producer-onboarding protocol

Draft municipal SLA for an IDP/SDBIP annex

One-page risk register

14 · GOVERNANCE AND RISK — WHAT THIS BRIEFING IS NOT

RISK	MITIGATION
Presented as an awarded NSNP contract	This briefing is a proposal. No government contract is claimed.
2.5 million daily meals read as current	Labelled as DBE-pathway plan, not current headcount.
BAS / LOGIS replacement fear	Explicit non-claim: SupplierAdvisor® does not replace BAS or LOGIS.
Learner data in MELIA extract	Lot-and-kitchen proof only. No learner names. POPIA purpose-limited.
PFMA / MFMA cannot buy the meal	90-day time-boxed legal workstream is ask 3 — before scale.

COMMERCIAL MODEL — LABELLED GROUP FIGURES, NOT GOVERNMENT CONTRACTS

355 000 meals

Programme-reported, not audited public stats

2.5 million children / day

DBE-pathway delivery plan, not current headcount

15 000 SANTACO containers

Pathway design

~20 jobs per mature node

Design intent, to be measured

10% of group profits to Foundation

Standing Group policy

CONCLUSION

The Plan has named Goals, Game Changers and Enablers. The Group has plates, an operating system, and a demonstration design mapped to each of them. What is asked in 90 days is a closed briefing, a named province, a lawful buying path for Game Changer 1.2, a MELIA protocol, and a seat at the tables already written into the Framework. Nothing here is an awarded tender, a current daily NSNP headcount, a replacement for BAS or LOGIS, or a claim to gazette VAT, grants or a Food and Nutrition Security Act.

Dr. Craig R. Muller · craig@bigfivegroup.africa · +27 (0) 82 581 4215 · bigfivegroup.africa
